Crystallization of isotactic polypropylene in ternary blends 585
– kinetics of glassy GeS_2 1883
Crystals, reaction front propagation in 1697
Cure, degree of, noncontact optothermal test for 1859
Curie temperature, of Fe-based metallic glass 13
Cyanotonickel (II) complexes, thermal decomposition and stereochemistry of 513
Cyano compounds, thermal decomposition of 927
Cyclocondensation of nitrosouracil derivatives 237
Cyclodehydration of polyamic acids, mass spectrometric thermal analysis 807, 1393
Cyclotriphosphate hexahydrate, dehydration of 1697

Dehydration front propagation in cyclotriphosphate hexahydrate 1697
– of zinc hydrogenphosphate monohydrate 1923
– of transition metal salts of furan-2-carboxylic acid 601
Dehydroxylation of nontronite 1867
– temperature of gibbsite and halloysite/kaolinite, variation of 1163
Depolymerization of trioxane, kinetics of 997, 1333
Derivate thermogravimetry, of cerium(III) nitrate hexahydrate 159
– –, of cyanatonickel(II) complexes 516
– –, of kerogen 839
– –, of lanthanide adipate hydrates 73
– –, of magnesium chloride hexahydrate 396
– –, of polyurethane foams 99
– –, of scandium(III) nitrobenzoates 674
– –, of tetracyanonickelates(II) 530
– –, of thorium(IV) dicarboxylates 57
– –, of transition metal(II) maleates and fumarates 571
– –, – –, picoline complexes 93
– –, – –, salts of furan-2-carboxylic acid 602
– –, of water desorption from porous glass 615
Derivatograph-C, estimating of kinetic parameters with 679
–, a microcomputer-controlled apparatus 301
Desorption of ammonia from mordenite 2009
Dielectric curves of synthetic zeolites 1272
– differential thermal analysis, role of water in 1271
– – – – of faujasite 321
Differential scanning calorimetry, of base oils 1807
– – –, of binary mixtures with aminophenazone 1253
– – –, of chitin-lipoprotein complex in lobster shell 1268
– – –, of chloroquine sulphate 1569
– – –, of copper(II) pyrazole complexes 1054
– – –, of cyano compounds 929
– – –, for determination of nitrogen in fertilizers 665
– – –, in glass transition region 629
– – –, of glassy GeS_2 1885
– – –, for heat capacity determination with a single run 1949
– – –, of hydrogencarbonates 524
– – –, of hydrogen hexachlororhenate(IV) salts 463
– – –, of indium selenide 116
– – –, of iron-based metallic glass 12
– – –, of iron(III) oxide, of γ to α transformation 857
– – –, of isotactic polypropylene in ternary blends 582
– – –, for kinetics of crystallization of glasses 1015
– – –, for measurement of thermal capacity 451
– – –, of monodentate substituted carbonyl complexes 1119
– – –, of nitrofurazone 488
– – –, of peroxide-azo derivative mixtures 1191
– – –, for phase diagram determination of ethynyl estradiol containing mixtures 123
– – –, of polypropylene 1803

Differential scanning calorimetry, of polyquinazolone polymers, effect of catalysts on 895
– – – of reactions of phenyl glycidyl ether with phosphoric acid 653
– – –, of semiconducting As-Se glasses 107
– – –, of sisal fibre 597
– – –, for thermal decomposition kinetics 1836
– – –, of urea complexes with hydrocarbons 1381
Differential thermal analysis, of adducts of rare earth element β-diketonates with polyethers 537
– – –, of aluminium-doped tricalcium silicate 1719
– – –, of 6-amino-5-formyl-uracil complexes 1130
– – –, of ammonium permanganate 887
– – –, apparatus for 1929
– – –, of arsenic selenide-arsenic system 552
– – –, of arsenic sulphide-arsenic system 198
– – –, of As-Se-Te glasses 420
– – –, of barbital 1549
– – –, of basic lead sulfate 82
– – –, of bayerite 63
– – –, of bismalimide resins 1029
– – –, of cadmium(II) thiourea complexes 1325
– – –, of calcium aluminate 1728
– – –, – chlorosilicate 1733
– – –, – orthosilicate 172
– – –, – polyphosphate mixture with minerals 1099
– – –, of carbosil adsorbents 1437
– – –, of catalyst precursors with ammonium nitrate 1778
– – –, of chitin-lipoprotein complex in lobster shell 1267
– – –, of chlorodiammino-dimethylsulfoxide platinum(II) isomers 506
– – –, of L-citrulline-water system 217
– – –, of clay from India 749
– – –, of complexes of phosphoramidothionate 495
– – –, of copper(II) acetate complexes with pyridine derivatives 720
– – –, – chloride-potassium chloride system 1387
– – –, – hyposulphite 38
– – –, – pyrazole complexes 1057
– – –, of cyanatonickel(II) complexes 516
– – –, determination of anhydrite by 1715
– – –, – of nitrogen in fertilizers by 667
– – –, of dinitrostilbene 1981
– – –, of dried UO_3 gel 1879
– – –, of hexachloroplumbate derivatives with pyridine 1770
– – –, of hydrargillite 63
– – –, of iron(II) complexes of ethylene glycol 1577
– – –, – sulphate heptahydrate – basic magnesium carbonate mixture 1507
– – –, instrument constant in 17
– – –, of kaolinite 1655
– – –, of lanthanide adipate hydrates 73
– – –, – complexes of square acid 2003

Differential thermal analysis, of lithium hydrogenhexavanadate 1560
– – –, – nitroxy compounds 50
– – –, of magnesium chloride hexahydrate 396
– – –, of mercerized cotton 1515
– – –, of metal oxide-organohalide-based flame retardants 1918
– – –, of miokamycin 1490
– – –, of mixed solvates with 1,4-dioxane 1969
– – –, of molecular sieve 780
– – –, of molybdenum trioxide 1917
– – –, of nickel(II) morpholine complexes 647
– – –, of Schiff-base complexes 991
– – –, of niobium sulphide 1107
– – –, of nitrofurazone 488
– – –, of nordstrandite 63
– – –, of organic one-step reactions, analytical expressions for 259
– – –, of polyurethane foams 99
– – –, of polystyrene 312
– – –, of rare earth 3-chlorobenzoates 1010
– – –, of riboflavin complexes 1662
– – –, of scandium(III) nitrobenzoates 674
– – –, of Schiff-base complexes 1153
– – –, of silica with modified surface 1756
– – –, of silicic acid 1084
– – –, of silicon nitride – lithium oxide mixture 446
– – –, of oxynitride-lithium oxide mixture 45
– – –, – – sodium oxide mixture 46
– – –, of silver-arsenic system 189
– – –, of sodium formate-sodium borohydride mixture 1350
– – –, of solvates of lithium chloride 1971
– – –, – of magnesium chloride 1974
– – –, of strontium formate dihydrate and deuterate 1544
– – –, of sun-exposed chloroquine phosphate 1139
– – –, for testing of lubricating oils 1404
– – –, of tetramine platinum(II) chloride 828
– – –, of tetracyanonickelates(II) 530
– – –, of 2H-tetrazole derivatives 1959
– – –, of textiles 905
– – –, thermal modelling of cells for 426
– – –, of thorium(IV) dicarboxylates 57
– – –, of transition metal dioxime complexes 787
– – –, – – maleates and fumarates 571
– – –, – – picoline complexes 93
– – –, – – salts of furan-2-carboxylic acid 602
– – –, of triazin derivative complexes 1668
– – –, of tris-thallium(III) glycollate 739
– – –, two point method for 17
– – –, of uranium trioxide gel microspheres 543, 1073
– – –, of water film on marble surface 1460
– – – of zinc hydrogenphosphate monohydrate 1924

Differential thermal analysis, of zinc sulphide-lead sulphate mixtures 1748
– – –, of zircon-alkali hydroxide mixtures 1703
Dilatometer, calibration of 1905
Dilatometry, of clays from India 749
Dilution of concentrated salt solution, calorimetry of 293
Dinitrostilbene, thermal behaviour of 1979
Dioxime complexes of transition metals, thermal decomposition of 785
Dolomite, interaction with Ca-polyphosphate 1100
Drop calorimetry, for determination of heat capacity of Bi_4Te_6 1201
Drying of uranium trioxide gel, effect on thermal decomposition 1071
Dynamic models for reconstruction of thermokinetics 173

Edible oils, thermoanalytical testing method for 1781
Electrical conductivity of doped bismuth trioxide 1215
Electromechanical coupling factor, temperature-dependence of 729
Electron microprobe analysis, of arsenic selenide-arsenic system 554
– – –, of arsenic sulphide-arsenic system 205
Enthalpy of crystallization, of miokamycin 1497
– of dehydration, of 6-amino-5-formyluracil complexes 1131
– of formation, of alkali borates 1696
– –, of lead selenide in melt 1487
– of fusion, of 6-amino-5-formyluracil complexes 1131
– –, of urea complexes with hydrocarbons 1384
– –, of dinitrostilbene 1979
– of melting of eutectic phase in water-polyoxyethylene system 171
– of mixing, of 2,4,6-collidine-alcohol mixtures 939
– of phase transition, of basic lead sulfate 83
– of reaction, of phenyl glycidyl ether-phosphoric acid 657
– – –, of thermal decomposition of ammonium sulphate 1855
– of thermal decomposition of azo derivatives 1192
– – –, of peroxide-azo derivative mixtures 1193
– – –, of peroxides 1192
– – transformation, of copper(II) complexes 1055
– – –, of iron(III) oxide 859
Entropies of fusion, of urea complexes with hydrocarbons 1384
Ethylene glycol complexes of iron(II), thermal decomposition of 1575
– propylene diene rubber, thermal degradation of 759
2-Ethylpyridinium metatungstate monohydrate, synthesis and thermal behaviour of 1449
Ethynyl-estradiol-lynestrenol, phase diagram of 131
– – – chlormadinone acetate, phase diagram of 133
Eutectic phase, enthalpy of melting of, in water-polyoxyethylene system 164

Faujasite, thermodielectrical analysis of 321
Feldspar, alteration of, study by TG 1163
Ferroelectric hysteresis loop, effect of temperature on, with transducer 732
Fertilizers, determination of nitrogen in, with DSC and DTA 661
Flame atomic absorption curves of flame retardants 1919
– retardants, thermal analysis of 1915

Flammability of upholstery textiles 901
Flash ignition temperature, of textiles 901
Flotability of marble, effect of tetradecylammonium chloride on 1466
Formates, thermal decomposition products of 1243, 1345, 1895
Forsterite, interaction with Ca-polyphosphate 1102
Friedman method, applied to multiple reactions 1177
Fumarates, of transition metal(II), thermal decomposition of 569
Furan-2-carboxylacid, transition metal salt, thermal decomposition of 601
Furoic acid, salts of, thermal decomposition of 601

Germanium sulphide, crystallization kinetics of 1883
Glasses, arsenic-selenium-tellurium, effect of thermal treatment on structure of 417
Glass transition, activation energy of, theoretical interpretation 623
Glassy germanium-antimony-sulphur systems, crystallization kinetics of 1015
– – sulphide, crystallization kinetics of 1883
Glycollate, of tris-thallium(III), thermal decarboxylation of 737

Heat capacity of Bi_4Te_6 1201
– –, determination with a single-run DSC 1949
– –, of indium selenide 118
– of dissolution, of lead selenide in liquid Pb-Se alloys 1477
– of distillation, of crude oil 1847
– of melting, of chloroquine phosphate 1141
– of fusion of Bi_4Te_6 1205
Heating rate, effect on the phase transition of basic lead sulfate 83
Hexacarbonyl complexes, thermal degradation of 1115
Hexachloroplumbate derivatives with pyridine, thermal decomposition of 1769
Hexachlororhenate(IV) salts, thermal decomposition of 463
Hematite, chlorination, TG study of 281
Heulandite, ionexchange heat of 949
High-temperature pyrolywis of polymers 1675
Hydrargillite, thermal decomposition of 64
Hydration of calcium chlorosilicate 1731
– of lanthanide oxides, kinetics of 637
– of tricalcium silicate 1719
Hydrazone complexes, thermal decomposition of 945
Hydrothermal transformation of copreciplated Al-Fe hydroxides 797

Infrared data of nickel(II) morpholine complexes 650
– spectra, of acids, precipitated from kerogen 839
– –, of aluminium-iron(III) hydroxides 800
– –, of doped bismuth trioxide 1211
– –, of lanthanide adipate hydrates 76
– –, of lanthanum selenate pentahydrate decomposition products 924
– –, of lubricating oils 1407
– –, of phosphogypsum 1737
– –, of thermal decomposition products of ammonium permanganate 886
– –, – – –, of cyano compounds 933

Infrared data, of thermal decomposition products, of magnesium chloride hexahydrate 398
Indium selenide, thermal behaviour of 115
Inorganic sulfates, dilution of, calorimetric study 293
Instantaneous mean activation energy, introduced new parameter 137
Intraframework thermal reactions of solids 1651
Ion exchange heat, of homoinic zeolites 949
Iron(II) complexes of ethylene glycol, thermal decomposition of 1575
Iron(III) molybdate-vanadium pentoxide system, phase equilibria 1751
– oxide, γ to α transformation, DSC study 857
Iron(II) sulphate heptahydrate-basic magnesium carbonate mixture, thermal decomposition of 1505
γ-Irradiation, effect on As-Se-Te glasses 423
Isotactic polypropylene in ternary blends, crystallization of 579
Isothermal thermogravimetry of silicone elastomers 1425, 1686

Kaolinite, intraframework thermal reactions of 1653
Kerogen, acids from, thermal decomposition of 835
Kinetic functions, unified approach to analysis of 249
– parameters, of dehydroxylation of nontronite 1874
– –, estimation of, with Derivatograph-C 679
– –, of thermal decarboxylation of tristhalliumglycollate 744
– –, – decomposition of hydrogen hexachlororhenate(IV) salts 467
– –, – –, of styrene-methacrylic acid copolymers 318
– –, – degradation of rocket insulator compound 764
– phase diagrams, theoretical analysis of 1645
Kinetics, application of mathematical statistics to 1145
– of crystallization of glassy Ge-Sb-S systems 1015
– of degradation of polysiloxanes 1431
– of dehydration of 2-ethylpyridinium metatungstate monohydrate 1454
– of dioxime complexes of transition metals 790
– of hydration of lanthanide oxides 637
– of oxidation, of niobium sulphide 1105
– –, of titanomagnetites 853
– of reactions of inorganic solids 1637
– of reduction of magnesium sulphate by carbon dioxide 1809
–, of supercooled β-phase decomposition of alloy 3
– of thermal decomposition of alkali earth metal oxalates 1524
– – –, of 2,2′-azobis(isobutyronitrile) 1833
– – –, of cadmium(II) thiourea complexes 1330
– – –, of hydrazone complexes 945
– – –, of hydrogencarbonates 521
– – –, of phosphogypsum 1739
– – –, of poly-N-vinylcarbazole derivatives 1775
– – –, of Schiff-base complexes 1151
– – –, of uranium trioxide gel 1418, 1877
– of water desorption from porous glasses 613
Lanthanide adipate hydrates, thermal decomposition of 71
– complexes of square acid, thermal decomposition of 2001
– oxides, hydration, kinetics of 637

Lanthanum selenate pentahydrate, thermal decomposition of 919
Lead selenide, heat of dissolution of, in liquid Pb-Se alloys 1477
– sulfate, basic, phase transition of 79
Lithium aluminium nitroxy compounds, formation 50
– chloride-water-1,4-dioxane mixed solvates, thermal behaviour of 1969
– hydrogenhexavanadate, thermal properties of 1559
– metasilicate-lithium nitride mixture, DTA 448
– silicon oxynitride, thermal decomposition of 45
Liquid metal fast breeder reactor, calculation of thermal stress in 873
– phase depolymerization, of trioxane kinetics of 997, 1333
Lobster shell, chitin-lipoprotein complex in 1265
Low density polyethylene, effect on thermal decomposition of peroxide-azo derivative mixtures 1189

Magnesite, interaction with Ca-polyphosphate 1099
Magnesium chloride hexahydrate, thermal decomposition of 393
– – -water-1,4-dioxane mixed solvates, thermal behaviour of 1969
– sulphate, reduction by carbon dioxide 1809
Magnetic moments of nickel(II) morpholine complexes 649
Magnetite, doped with calcium, thermal synthesis of 1711
–, enthalpy of oxidation of 865
Maleates of transition metal(II), termal decomposition of 569
Manganese(I) sulphate pentahydrates, study in quasi-isothermal quasi isobaric conditions 307
Manganous hydrogenphosphate trihydrate, kinetic of thermal decomposition 1643
– oxide – water system, phase equilibria 1824
Mass spectra of thermal decomposition of 2H-tetrazole 1963
– spectrometric thermal analysis, of amic acids complexes with amide solvents 807
– – – –, of polyacid amide films 1394
– – – –, of tetraaminoplatinum(II) chloride 828
– – – –, of thermal degradation of polypyromellitimide 815
Mathematical statistics, applied to non-isothermal kinetics 909, 1145
Mechanical characteristics of sisal fibre 595
Mercerized cotton, thermal stability of 1511
Metal standards, for calibration of dilatometers 1909
Metastable microstructures, formation of, theoretical analysis 1645
Microcalorimetry, for determination of ionexchange heat of zeolites 949
Microcomputer-controlled derivatograph 301
Microporous adsorbents, adsorption in, solution thermodynamics of 1361
Miokamycin, control of crystallinity of, by DTA 1489
Miscibility gap, on phase diagram of silver-arsenic system 193
Modeling nonisothermal reactions, new equation for 149
Molecular sieve, thermal decomposition of 777
Montmorillonite, intraframework thermal reaction of 1654
Mordenite, desorption of ammonia from 2009
–, ionexchange heat of 949
Morpholine, complexes with nickel(II), synthesis and thermal study 645
Morphology of altered feldspar grains 1170
– of basic lead sulfate crystals 88
– of isotactic polypropylene ternary blends 591

Mössbauer spectrum, of iron(II) complexes of ethylene glycol 1580

Nickel(II) oxide – water system, phase equilibria 1825
– Schiff-base complexes, thermal decomposition of 989
Niobium sulphide, oxidation, kinetics of 1105
Nitrobenzoates, of scandium(III), thermal decomposition of 671
Nitrofurazone, thermal decomposition of 485
Nitrogen, determination in fertilizers with DSC and DTA 661
Nitrosouracil derivatives, thermally initiated cyclocondensation of 237
Nonisothermal decomposition kinetics of 2,2'-azobis(isobutyronitrile) 1833
– kinetics, application of mathematical statistics to 249, 909
– –, nontraditional approaches of 1145
– rate signals, characteristic temperatures of 259
– reactions, new equation for modeling of 149
Nontraditional approaches to nonisothermal kinetics 1145
Nontronite, dehydroxylation of 1867
Nordstrandite, thermal decomposition of 65

Oils, lubricating, thermooxidation stability of, by DTA 1401
–, thermooxidative stability of 1805
Organic products, of thermal decomposition of formates 1243
Overlapping reactions, application of the Ozawa-Flynn-Wall method to 137
Oxalates, effect of atmosphere on thermal decomposition of 1229
–, formation in thermal decomposition of formates 1895
Oxidation of magnetite, enthalpy of 865
– of niobium sulphide, activation energy of 1111
Ozawa-Flynn-Wall method, application to coal pyrolysis 145
– – – –, for multiple reactions 1177

Peritectoid decomposition of arsenic selenide (As_4Se_3) 559
Peroxide – azo derivative mixtures, DSC of 1189
Phase diagram, of arsenic selenide-selenium system 553
– –, of arsenic sulphide-arsenic system 198
– –, of dinitrostilbene isomers 1985
– –, of silver-arsenic system 188
– –, of sodium chloride-calcium sulphate system 1716
– –, of thallium telluride – silver telluride system 230
– –, thermodynamics and thermochemistry of 1645
– –, of urea complexes with hydrocarbons 1382
– –, of iron(III) molybdate – vanadium pentoxide system 1752
– equilibria, of metal oxides-water system (M = Mn, Ni, Cd) 1829
– transition, of basic lead sulfate 79
– –, of indium selenide 116
Phenyl glycidyl ether, reaction with phosphoric acid, DSC 653
Phosphogypsum, isothermal decomposition of 1739
–, thermal decomposition of 1735
Phosphoramidothionat complexes, structures of, by thermal analysis 491
Photochemical transformations in PVC 1791

Photothermal test, for evaluation of the degree of cure 1859
Picoline complexes, of transition metals, thermal decomposition of 91
Polyacid amides, complex formation and cyclodehydration of 1393
Polyethers, adducts with rare earth element β-diketonates, thermal stability of 533
Polymer-asphalt compositions, properties of 1797
Polymeric composites, evaluation of the degree of cure of 1859
Polymers, chlorine containing, thermal degradation, effect of metal oxides on 1785
– high-temperature pyrolysis of 1675
Polymorphism of barbital 1547
–, of calcium aluminate 1728
–, of calcium orthosilicate 1723
Polyoxyethylene-water system, calorimetry of 161
Polypropylene coating, chazacterization by thermal methods 1801
Polypyromellitimide, thermal degradation of 815
Polyquinazolone polymers, thermal stability of 893
Polystyrene, thermal degradation of 311
Polyurethane foam, thermal behaviour of 97
Poly-N-vinylcarbazole derivatives, thermal stability of 1773
Poly(vinylchloride), photochemical transformations in 1791
Potassium hydrogencarbonate, thermal properties of 521
Preparation, thermal, of diferrous tetrametaphosphate 1707
Proton affinity, of sulphate and bisulphate ions 1855
Purity determination, with DTA 1936
Pushrod dilatometer, calibration of 1905
Pyrolysis of polymers, high-temperature 1675

Rare earth complexes with *o*-aminobenzoic acid, thermal decomposition of 1355
Reactor, liquid metal fast breeder, calculation of thermal stress in 873
Reaction between ZnS and $PbSO_4$, thermal analysis of 1747
Reduction of barium sulphate, effect of additives 1743
Reduction of magnesium sulphate by carbon dioxide, kinetics 1809
–, temperature-programmed, of Ru-Cu samples 471
Riboflavin complexes, thermal decomposition of 1659
Rock salt, determination of anhydrite in 1715
Rocket insulator, thermal degradation of 755
Ruthenium-copper samples TPR reduction of 471

Sample holder, catalytic effect of 312
Scandium(III) nitrobenzoates, thermal decomposition of 671
Scanning electron microscopy, of isotactic polypropylene blends 591
– – –, of reduced magnesium sulphate 1816
Schiff-base complexes of copper(II) and palladium(II), thermal decomposition of 1151
– –, of nickel(II) thermal decomposition 989
Selenium, DSC 109
Semiconductivity of bismuth trioxide, temperature function of 1209
Silica, with modified surface, thermal stability of 1755
Silicanes, thermal stability of 1755
Silicic acid, identification by thermal analysis 1081

Silicone caoutchouc polymers, thermal stability of 1421, 1683
Silicon oxynitride compound, thermal decomposition of 771
– –, reaction with lithium oxide and metasilicate 445
– –, – lithium and sodium oxides 43
– rubber, thermal stability of 1421
Silver-arsenic system, study using T–V–x diagram 185
Simulation of DTA experiences, with alloys 425
Single run DSC 1952
Sisal fibra, thermal degradation of 595
Sodium formate, reaction with sodium borohydride 1900
– hydrogencarbonate, thermal properties of 521
– level, thermal stress of, in liquid metal fast breeder reactor 873
– silicon oxynitride, thermal decomposition of 46
Soils, study of feldspar alternation in 1163
Solidification, growth parameters of, qualitative dependences 1647
Solid-state thermal decomposition of furoic acid salts 601
Solids, intraframework thermal reactions of 1651
Solution thermodynamics of adsorption in microporous adsorbents 1361
Sorbents in chromatography, effect of heating on 409
Sorption properties of hydrated aluminium oxides 1763
Space of kinetic functions 250
Specific heat of triglycine sulphate 1535
Square acid, lanthanide complexes of, thermal decomposition 2001
Stability of chloroquine sulphate against radiation 1567
Statistical evaluation of non-isothermal kinetics 1833
Steady-state thermokinetic reactor, operating principle of 1991
Steric effect and decomposition temperature with complexes 717
Stereochemistry of cyanatonickel(II) complexes 518
Strain in barium titanate hafnate transducer, effect of temperature on 733
Strontium formate dihydrate and deuterate, dehydration 1539
Structure of copper(II) complexes, influence on thermal transformation 1051
Styrene, copolymers with methacrylic acid, thermal stability of 315
Submicronic magnetite, enthalpy of oxidation of 869
Substituted tetrazoles, thermal behaviour of 1957
Supercooled alloy, β-phase decomposition of 3
Supports, effect on a bimetallic catalysts 471
Surface-isothermal sensing unit for DTA 17

Technical oils, thermoanalytical testing methods for 1781
Temperature-programmed desorption of ammonia from mordenite 2009
– – reduction of Ru-Cu samples 471
Tetraamineplatinum(II)chloride, thermal decomposition of 825
Tetracyanonickelates(II), thermal decomposition of 527
Tetradecylammonium chloride, modification of marble with, water film on 1459
Tetrametaphosphate, diferrous, thermal preparation 1707
2H-Tetrazole derivatives, thermal behaviour 1957
Textiles, flash ignition temperature of 901
Thallium telluride – silver telluride system, phase diagram 230

Thermal activation of mordenite 2010
– behaviour of 6-amino-5-formyluracil complexes 1127
– – of chloro-diammine-dimethylsulfoxide-platinum(II) isomers 505
– – of 2-ethylpyridinium metatungstate monohydrate 1449
– – of indium selenide 115
– – of lithium hydrogenhexavanadate 1559
– capacity, of copper(II)oxide 455
– –, of corundum 458
– –, of magnetite 459
– –, of solids by DSC 451
– characterization of bismaleimide blends 1023
Thermal characteristics of silicon caoutchouc polymers 1683
– decarboxylation of tristhallium(III) glycollate 737
– decomposition, of acids precipitated from kerogen 835
– – of alkali earth metal oxalates 1521
– – of aluminium lithium nitroxy compounds 50
– – of aluminium hydroxides 61
– – of ammonium nitrate 1777
– – of ammonium permanganate 883
– – of cerium(III) nitrate 157
– – of copper(II) complexes 1051
– – of cyanato nickel(II) complexes 513
– – of cyano compounds 927
– – of doped ammonium perchlorate 1219
– – of edible and technical oils 1781
– – of formates 1345
– – of hexachloroplumbate derivatives with pyridine 1769
– – of hydrazone complexes 945
– – of iron(II) sulphate heptahydrate-basic magnesium carbonate mixture 1505
– – of lanthanide adipate hydrates 71
– – – complexes of square acid 2001
– – of lanthanum selenate pentahydrate 919
– – of lithium hydrogen hexavanadate 1559
– – of magnesium chloride hexahydrate 393
– – of mineral zircon 1701
– – of molecular sieve 777
– – of nickel(II) Schiff-base complexes 989
– – of nitrofurazone 485
– – of oxalates, effect of atmosphere on 1229
– – of formates, organic products in 1243
– – of peroxide-azo derivative mixtures 1189
– – of phosphogypsum 1735, 1739
– – of rare earth complexes with *o*-aminobenzoic acid 1355
– – 3-chlorobenzoates 1005
– – of riboflavin complexes 1659
– – of scandium(II) nitrobenzoates 671
– – of Schiff-base complexes of Cu(II) and Pd(II) 1151
– – of silicanes 1755

Thermal decomposition of silicon oxynitride compound 771
– – of solids, typical curves of 1641
– – of styrene-methacrylic acid copolymers 318
– – of tetraamineplatinum(II) chloride 825
– – of tetracyanonickelates (II) 527
– – of thorium(IV) benzenedicarboxylates 55
– – of transition metal(II) maleates and fumarates 569
– – of transition metal salt of furan-2-carboxylic acid 601
– – of triazine derivatives 1667
– – of uranium trioxide gel microspheres 541, 1415, 1877
– –, – – –, effect of drying on 1071
Thermal degradation of chlorine containing polymers 1785
– – of coordination polymers 1369
– – of hexacarbonyl complexes 1115
– – of polypyromellitimide 815
– – of polystyrene 311
– – of rocket insulator 755
– dehydration of strontium formate dihydrate and deuterate 1539
– diffusivity measurement with transverse photothermal detlection spectroscopy 1039
– methods for characterization of polymer-asphalt compositions 1797
– oxidation of titano-magnetites 845
– preparation of diferrous tetrametaphosphate 1707
– stability of chloroquine phosphate 1139
– – of polyether adducts with rare earth element β-diketonates 533
– – of polyquinazolone polymers 893
– – of silica with modified surface 1755
– – of silicon rubbers, increase of by additives 1686
– – of poly-N-vinylcarbazole derivatives 1773
– – of poly(vinylchloride) 1793
– synthesis of calcium doped magnetite 1711
– transformation of anhydrous alumina 67
– treatment of coal, effect on gasification 1066
– – for synthesis of nickel(II) morpholine complexes 645
Thermodesorption, of water from porous glass 613
Thermodielectrical method, for study of faujasite 321
Thermodilatometry in glass transition region 629
– of kaolinite 1655
Thermodynamic studies of MO-H_2O systems (M = Mn, Ni, Cd) 1823
Thermogravimetry of adducts of rare earth element β-diketonates with polyethers 537
– of alkali earth metal oxalates 1523
– of aluminium-doped tricalcium silicate 1721
– of 6-amino-5-formyluracil complexes 1130
– of ammonium permanganate 887
– application to study of feldspar alteration 1163
– of barbital 1551
– of base oils 1806
– of bayerite 63
– of cadmium(II) thiourea complexes 1325

Thermogravimetry of calcium doped magnetic 1712
– – polyphosphate mixture with minerals 1098
– of carbosil adsorbents 1437
– of catalyst precursors with ammonium nitrate 1778
– of cerium(III) nitrate hexahydrate 159
– of chitin-lipoprotein complex in lobster shell 1267
– of chlorine containing polymer – metal oxide mixtures 1787
– of chlorination of hematite and wustite 285
– of chlorodiammine-dimethylsulfoxide platinum(II) isomers 506
– of chloroquine sulphate 1569
– of coal 1066
– of complexes of phosphoramidothionate 495
– of coordination polymers 1372
– of copper(II) acetate complexes with pyridine derivatives 720
– – chloride – potassium chloride system 1388
– – pyrazole complexes 1057
– of crude oil 1845
– of cyanatonickel(II) complexes 516
– of cyano compounds 929
– of dried UO_3 gel 1879
– of dinitrostilbene 1981
– of 2-ethylpyridinium metatungstate monohydrate 1452
– of hexachloroplumbate derivatives with pyridine 1770
– of hydrargillite 63
– of hydrogen carbonates 524
– of iron(II) complexes of ethylene glycol 1577
– – sulphate heptahydrate-basic-magnesium carbonate mixture 1507
– of lanthanide adipate hydrates 73
– – complexes of square acid 2003
– of lanthanum selenate pentahydrate 922
– of lithium hydrogenhexavanadate 1560
– of magnesium chloride hexahydrate 396
– of metal oxide-organohalide-based flame retardants 1918
– of molecular sieve 780
– of molybdenum trioxide 1917
– of monodentate substituted hexacarbonyl complexes 1119
– of niobium sulphide 1107
– of nickel(II) Schiff-base complexes 991
– – morpholine complexes 647
– of nitrofurazone 488
– of nontronite 1868
– of nordstrandite 63
– of polypropylene 1802
– of polyquinazolone polymers, effect of catalysts on 895
– of polyurethane foams 99
– for preparation of diferrous tetrametaphosphate 1708
– of rare earth 3-chlorobenzoates 1010
–, for reduction of magnesium sulphate by carbon dioxide 1814

Thermogravimetry of riboflavin complexes 1662
– of rocket insulator 758
– of scandium(III) nitrobenzoates 674
– of Schiff-base complexes of Cu(II) and Pd(II) 1153
– of silica with modified surface 1756
– of silicic acid 1084
– of silicone oxynitride-lithium oxide mixture 45
– – – sodium oxide mixture 46
– of sisal fibre 598
– of sodium formate-sodium borohydride mixture 1350
– of solvates of aluminium chloride 1973
– of lithium chloride 1972
– of magnesium chloride 1973
– of strontium formate dihydrate and deuterate 1543
– of tetraamineplatinum(II) chloride 828
– of tetracyanonickelates (II) 530
– of 2H-tetrazole derivatives 1959
– of textiles 905
– of thorium(IV) dicarboxylates 57
– of titanomagnetites 848
– of triazin derivative complexes 1668
– of transition metal dioxime complexes 787
– – – maleates and fumarates 571
– – – picoline complexes 93
– – – salts of furan-2-carboxylic acid 602
– of tris-thallium(III) glycollate 739
– of uranium trioxide gel microspheres 1073
– of water film on marble surface 1460
– of zinc hydrogenphosphate monohydrate 1924
– of zinc sulphide-lead sulphate mixtures 1748
– of zircon-alkali hydroxide mixtures 1703
Thermokinetic measurement in steady state thermokinetic reactor 1995
– reactor, use of, in steady state manner 1991
Thermokinetics, reconstruction of dynamic models for 173
Thermomagnetometry, for investigation of structural relaxation 9
Thermomicroscopy, for phase diagram determination of ethynyl estradiol containing mixtures 124
Thermooxidation of lubricating oils, testing by DTA 1404
Thermooxidative stability of base oils 1805
Thiourea, substituted, complexes with Cd(II), thermal decomposition of 1323
Thorium(IV) benzenedicarboxylates, thermal decomposition 55
Time-space calorimetry 17
Titanomagnetites, thermal oxidation of 845
Topochemistry, role in kinetics of solid-state reactions 1635
Transducer, temperature-dependence of electromechanical coupling of 729
Transition metal dioxime complexes, thermal decomposition 785
– – maleates and fumarates, thermal decomposition 569
– – picoline complexes, thermal decomposition 91
Transparency method for phase diagram determination of ethynyl estradiol containing mixtures 125

Transverse photothermal deflection spectroscopy, theory of 1039
Triazine derivatives, thermal decomposition of 1667
Tricalcium silicate, Al-doped, hydration of 1719
Triglycine sulphate, electrical and thermal properties 1531
Trioxane, liquid-phase depolymerization of 997
–, sequential kinetic analysis of depolymerization of 1333
Triple point determination, by DTA 1936
Tris-thallium(III) glycollate, thermal decarboxylation of 737

Uranium trioxide gel microspheres, thermal decomposition of 541, 1071, 1415, 1877
Urea, complexes with hydrocarbons, fusion of 1381

Vaporization of crude oil, thermal study of 1843
Washing, effect of, on thermal decomposition of UO_3 1415
Water desorption from porous glasses, kinetics 613
Water film on modified marble surface, thermal analysis of 1459
Water-polyoxyethylene system, calorimetry of 161
Water, type and quantity, determination in silicic acid 1081
Wustite, chlorination, TG study of 281

X-ray diffraction of calcium aluminate 1728
– – of chlorodiammine-dimethylsulfoxide platinum(II) isomers 508
– – of controlled porosity glasses 412
– – of copper(II) hyposulphite 37
– – determination of phase diagram by 229
– – of doped bismuth trioxide 1213
– – of dried uranium trioxide gel microspheres 1077
– – of isotactic polypropylene in ternary blends 590
– – of lanthanide adipate hydrates 77
– – of lanthanum selenate pentahydrate decomposition products 924
– – of mercerized cotton 1514
– – of phosphogypsum 1736
– –,study of aluminium-iron(III) hydroxides by 799
– – of thermal products of ammonium permanganate 889
– – – – of magnesium chloride hexahydrate 399

Zeolites, homionic, ionexchange heat of 949
Zinc hydrogenphosphate, mechanism of dehydration 1923
– sulphide-lead sulphate mixture, thermal analysis 1747
Zircon mineral, thermal decomposition by alkali hydroxides 1701
